ABSTRACT

This presentation is the announcement of the latest version of MoReq, the fourth edition of the specification since it was first published in 2001 and the successor to MoReq2010. The specification itself will be released by the DLM Forum to coincide with the Triennial Conference in Lisbon. The presentation will be accompanied by an introduction to the main themes of MoReq, an overview of the new modules, an explanation of the layout of the specification, as well as a demonstration of MoReq in use. The demonstration will include a new web services based interface to MoReq Compliant Records Systems.
